EDUCATION

UNIVERSIDAD DE LA SALLE

Civil engineer degree

Bogotá D.C, CO — Aug 2018

SENA

Technician in documentation and accounting record

Bogotá D.C, CO — Nov 2010

PROFILE

I am a front end developer and civil engineer with four years of experience in development and building of different kinds of buildings in some Colombian cities.

I have led projects with social focusing, I have stood out due to quick decision making in situations that need it, and a great human resources management to accomplish with established targets and stipulated time from project beginning.

Currently I am starting my career as a web developer with some freelance projects as a front-end developer, besides that, I am part of a FullStack JavaScript Bootcamp where the own work is combined with the team work between senior and junior developers, all of this with efficient and actual use apps. I am eager of beginning my professional and personal growth process in a company of the field.

EXPERIENCE

FRONT END DEVELOPER

Dic 2022 - Present

- Development of personal web portfolio, using HTML 5, CSS 3 and JavaScript knowledge.
- Development of a website for a family business dedicated to the cultivation and export of Colombian flowers (in development stage).
